

## COMBITEC – Tamper Evident Inline Machine

**KARLVILLE**

The COMBITEC is a compact machine solution, developed with the Scheidegger experience and reliability of its technology. It is a servo motorized machine with an easy and accurate set-up. The unit comes with an infrared electric tunnel and a shrink sleeve applicator, both fully adjustable for accurate and efficient shrinkage.

This new and affordable machine is a tamper applicator, with a rejection system and an infrared shrink tunnel, that allows for a perfect tamper application, ideal for all markets.
