

## Seam- K1

**KARLVILLE**

The K1 is our entry level model for narrow web Digital & Flexographic printers who are looking for a reasonable investment. The K1 operates at 100 meters per minute with a 55mm to 200mm lay flat production. Optional kits may be purchased for narrow web production up to 18mm.

The machine is portable on wheels and may be powered via 110V or 220V power. The solvent application is via wick and the forming system utilizes the proven Karlville fully adjustable forming design. The machine features a cantilevered unwind & rewind. The rewind has the Karlville oscillation system integrated into the rewind shaft. The K1 is easy to operate and offers lay flat tolerances well within industry standards. For the K1, we also provide web based services to help you jump start your operation

### Machine Specifications

Description	Spec
Speed	100 m/min
Width	200 mm
Material Width	420 mm
Rewind Diameter	450 mm
Unwind Diameter	450 mm
Minimum Lay flat Width	40 mm with 18 mm Option
Core diameter	3"(76mm)
Lay Flat Tolerance	0.5 mm

## Top Position Perforation

- Hardened Roller
- Pneumatic Knives
- Applications: Tamper Evident / Recycling & Reuse
