

SI-30BP

KARLVILLE

The SPOUTPRO IS – 30BP is our model for automatically upload the pouches and insert the neck to PacXpert type flexible pouches. This machine will be fed with pre-made, double handle, 100% PolyEthylene jumbo pouch – PacXpert

Machine Specifications

Description	Spec
Speed	30 ppm
Neck inserting speed	25 to 30 units/min
Change over time	80/120 mm
Spout Position	Top

Machine Specifications – SpoutPro IS-30BP

- Length: approx. 4.0 m. / Width approx. 5.0 m.
- Height: approx. 3.0m
- Weight: approx. 3,500 kg
- Air consumption approx. 20Liter / cycle at 6 bar.
- Voltage: (Three phase,N,PE) 480 Volt / 50 Hertz Control voltage 24 Volt.

Features

- Stainless steel construction, heavy duty, solid welded machine.
- Clean in Place
- High Performance
- Safe Process
- Small Footprint
- Highly flexible
- Large format range
- Ideal for pouch makers or brand owners/copackers

Advantages of Inline-neck inserting

- Reduced cost by inserting spout in one process in one solid platform.
- Improved transportation efficiency by more pouches per box (no spout inserted in pouches)
- Less inventory space required for stocking pre-made pouches compared with railed spouted pouches.
- Better quality by not having bended prespouted pouches
- Highly reliable process
- Compact machinery built for a safe operation.

Layout

● compressed air
 pressure/Druck: 3/8", 6 bar

● power supply
 3L / N / PE
 400V, 50Hz

Products

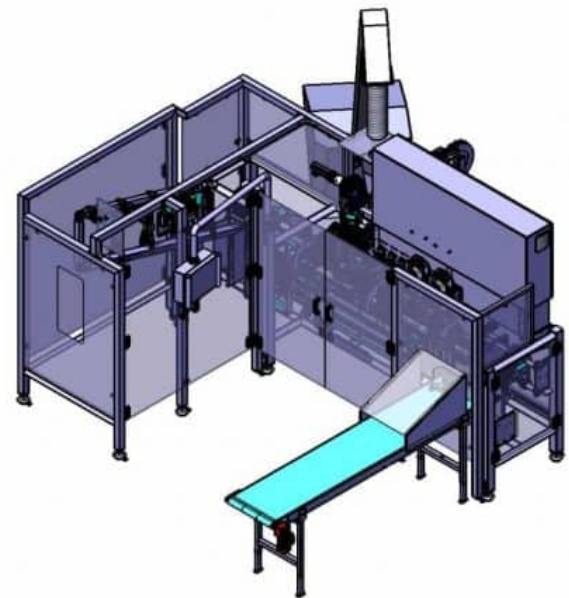

FOOD:

- Edible Oil
- Dressings – Ketchup, Mayonnaise, Mustard
